

TEXTILE BASED VENTILATION SYSTEMS

auditoriums and theatres

KE Fibertec ducts have been chosen readily for these applications as they can deliver large volumes of cool air quietly and without draughts. Systems can be designed with loads up to $300\text{W}/\text{m}^2$ without draught, making textile systems suitable for high capacity venues. Our systems can be found in theatres, recording studios, churches and nightclubs.

auditoriums and theatres

THE **BENEFITS OF** KE FIBERTEC DUCTS

1. High level of comfort - Very low terminal velocities
2. Prevents draughts that are often experienced with cassette units
3. Aesthetically pleasing
4. Absorbs sound within the space and delivers the supply air quietly
5. Long throws possible with inject system
6. Can be dyed to perfectly match interior

CHOICES
